

### How to use the patch

- Each patch is packed in a separate sachet.
- Before opening the sachet decide where you are going to stick this new patch and check you have removed any old patch.
- Stick the Neupro patch onto your skin as soon as you have opened the sachet and removed the release liner.

1. Each patch is packed in a separate sachet.

2. To open the sachet, hold the sachet in both hands and peel apart the foil.

3. Open the sachet and take the patch out.

4. The sticky side of the patch is covered by a transparent release liner. Hold the patch in both hands with the release liner facing you.

5. Bend the patch in half. This makes the S-shaped break in the liner open up.

6. Peel off one side of the release liner. Do not touch the sticky side of the patch with your fingers.

7. Hold the other half of the rigid release liner. Then put the sticky half of the patch onto your skin. Press the sticky side of the patch firmly into place.

8. Fold back the other half of the patch and remove the other side of the release liner.

9. Press the patch down firmly with the palm of your hand. Keep it pressed for about 30 seconds. This makes sure the patch is touching the skin and the edges stick down well. Wash your hands with soap and water straight after handling the patch.
